

Duo Authentication on myBYU

The two-step verification (Duo Authentication) is meant to add security to your BYU accounts. It prevents people from logging in as you without your permission.

To know how it works, how to set it up, how to add new devices or tokens, or using passcodes instead of a smart device, follow the following links:

How DUO Works (basic information for how the two-step verification works): [BYU Duo-How It Works](#)

Setting up DUO and Adding New Devices: [BYU Duo-Set Up and Devices](#).

Get 10 Passcodes (in case you can't access your mobile device): [BYU Duo-Passcodes](#)
